*from the heart of a craftsman*

[stollindustries.com](http://stollindustries.com)

# FORGING PARTNERSHIPS SINCE 1969.

Stoll Fireplace, Inc. was established in 1969 when Mr. William Stoll designed and hand-crafted a custom screen for his South Carolina home. Mr. Stoll's Christian values continue to be the guiding principles of the company's ethical standards and customer satisfaction.

Stoll Industries was formed after a lasting and successful tenure in the fireplace industry. Using their expertise in metal works, Stoll Fireplace, Inc. decided to broaden their custom metal designs to feature cabinets, walls, doors, drawers and backsplashes.

Today, the 3rd generation of the family continues to build on Stoll's reputation in the industry for innovation, customer support, and quality hand-crafted products for the home.

## Our Mission:

To be **intentional** in our actions, building an environment of **honesty** and **faith** that creates a platform for **God** in the workplace.

PROUDLY MADE IN THE USA.

Our wide range of products can be found in the finest specialty stores and design centers throughout the US and Canada.

*Our series displaying custom metal work.*

**12**

### Modern

*Our series designed for contemporary settings.*

**22**

### Components

*Choose from a variety of components to give your fireplace doors a customized look to fit your individual style.*

**28**

*Fire shown inside closed doors is for display purposes only. Do NOT burn with doors closed unless your doors have pyro-ceramic glass.*

# Fireplace Education:

The fireplace is one of the most enduring and desirable elements of the American home.

Enhance the beauty and usefulness of any fireplace design while increasing safety and efficiency with the installation of a quality Stoll Industries fireplace door.

We desire to educate and inform you about our products. Use our helpful tutorial to determine which type of fireplace is in your home, and which products are compatible with your existing fireplace.

## Types of Fireplaces

A series of color-coded symbols are listed below and used throughout the brochure to quickly identify compatibility with various fireplace types and styles.

**M** Masonry

**DV** Direct Vent

**ZC** Zero Clearance

**RF** Reface

## Fireplace Sizes

Look for the sizing icon used throughout the brochure to quickly identify compatibility with various fireplace sizes.

### Standard Sizes

*Stoll offers standard sizes designed to fit a range of fireplace openings for faster delivery or the budget-conscious homeowner.*

### Custom Sizes

*Stoll can custom build a set of doors to meet your exact fireplace specifications.*

## Fireplace Door Types:

### M Masonry

Masonry fireplaces take many forms, from brick and stone to marble and modern glass designs. These types of fireplaces require an external chimney for smoke to escape, but often allow outside air to enter the home.

Our fireplace doors eliminate 90% of the cold air drafts that may occur, adding functionality to their elegant appearance.

*Look for a brick or stone fireplace that is combined with a working chimney.*

### ZC Zero Clearance

A zero clearance or factory-built fireplace is a metal box with refractory bricks inside manufactured to be framed into a house. Stoll doors are specially made to fit your brand of manufactured fireplace, with proper “air flow” provided in various ways to ensure all ventilation requirements of the manufacturer are met.

*Identification Tip: Look for a manufactured metal fireplace box.*

### DV Direct Vent

While a traditional fireplace provides an open burning chamber that vents through a chimney, a direct vent fireplace does not require a chimney and can vent horizontally out a side-wall or vertically to the roof. The front glass enclosure is porous, allowing radiant heat to pass into the room.

As a result, the glass face can become extremely hot. As a safety feature, Stoll incorporates a mesh panel that covers the glass to prevent burning, but still allows the heat to pass through.

*Look for a manufactured metal fireplace box that contains a sealed glass panel that does not open.*

M Masonry fireplace

ZC Zero Clearance fireplace

### RF Reface

The Stoll reface option is custom designed to fit pre-manufactured fireplaces, but incorporates decorative louvers to cover the ventilation openings.

Our magnetic mounting system allows for quick and easy installation.

# Traditional

The traditional series from Stoll is our time-proven line of custom made fireplace doors. Choose from a variety of custom and standard options, durable powder coat finishes, solid metal overlays, or any combination to accent and beautify your fireplace setting.

Original	07

## Legacy Collection

This line of extruded aluminum doors showcases Stoll innovation and design. Features including all-in-one mounting system, thicker extrusions, hinges that allow doors to open 180 degrees, make the Legacy Collection the best extruded aluminum doors to own.

# Rustic

The rustic series captures the charm and style of metal work created in the days of the blacksmith's forge. Choose from a variety of hammered, distressed, and embellished designs to complement your hearth.

Blacksmith	13
Aged Iron	14
Forged Iron	15
Old World	16

### DV-Reface

*shown in burnished copper*

Custom Sizes

### ZC-Reface

*shown in clear natural, with rustic window pane, handles on center bar and 1517 louvers*

Custom Sizes

## Aged Iron

Aged iron doors are heated and hand forged to a unique hammered finish. This distressed iron texture gives your fireplace a rustic warmth and charm.

Custom Sizes

### Features:

- Low Profile Frame
- Rustic Hand Hammered Design

### Frame Details:

- 3ga Steel
- 2" Default Frame Width
- 1/4" Default Frame Depth
- 1" Door Frame

*shown in clear natural, with lapjoint design and handles on center bar*

### DV-Reface

*shown in clear natural*

### ZC-Reface

*shown in burnished bronze, with 1519 louvers*

## Forged Iron

Hand forged distressed metal that produces a deeply dimpled and scarred surface reminiscent of hand-wrought metal.

### Features:

- Low Profile Frame
- Rustic Hand Hammered Design

### Frame Details:

- 3ga Steel
- 2" Default Frame Width
- 1/4" Default Frame Depth
- 1" Door Frame

*shown in burnished copper*

### DV-Reface

*shown in burnished copper and textured black, with 1520 louvers*

### ZC-Reface

*shown in burnished bronze, with 1520 louvers*

## Old World

This design pairs hammer distressed metal and riveted corner brackets to replicate the look of metalwork crafted at the forge and anvil.

### Features:

- Low Profile Frame
- Laser-cut Seamless Frame
- Hand Distressed Edges
- Corner Brackets and Rivets

### Frame Details:

- 7ga Steel
- 2" Default Frame Width
- 3/16" Default Frame Depth
- 1.5" Door Frame

*shown in industrial black*

### Sliding Door

*door profile*

### Sliding Door

*shown in copper vein,  
with single door*

## Sliding Door

This unique design allows the doors to roll back and forth on the frame the same as traditional sliding barn doors.

### Features:

- Unique “barn door” design
- Premium Rollers and Track System

### Frame Details:

- 7ga Steel
- 2” Default Frame Width
- 3/16” Frame Depth
- 2” Door Frame

shown in textured black
