

PRODUCTS FOR

MANUFACTURED FIREPLACES

GLASS DOORS . ReFACES

ReFaces & Glass Doors

REIMAGINE what your old tired black fireplace could become if you could add some color, accents and personal touches. Dream, sketch, collect ideas and use our sample pictures in this brochure to imagine your renovated fireplace.

REDESIGN with our wide selection of styles, colors and options. For a personal touch, laser-cut a name or custom design into your ReFace. The result will be a complete fireplace make-over that reflects your tastes and fits perfectly.

REFACE that old fireplace in a snap. Literally. The Stoll ReFace installs with neodymium (*rare earth*) magnets which attach themselves to the exposed black metal of your fireplace. One simple snap and the transformation is complete.

ReImagine what your fireplace could become, **ReDesign** with our varied styles, colors, and design options; then **ReFace** to completely transform your manufactured fireplace.

ZC GLASS DOORS work exceptionally well as a high quality replacement to OEM doors and screens for flat face metal boxes where the fireplace surround (*brick, tile, marble, etc*) comes right up to the fireplace opening.

These ZC doors offer the same features and design options as our renowned masonry fireplace doors, with one very important addition. Zero Clearance Fireplaces require an air exchange between the “inner” firebox and “outer” cabinet to keep all surfaces cool against the walls of your home. All Stoll ZC Glass Doors and ReFaces meet ventilation requirements for circulating fireplaces; allowing a proper amount of air to enter the firebox area.

NOTE: Manufactured (ZC) fireplaces require an air flow through the firebox to prevent overheating. Stoll engineers the proper air intake through slots or spaces in the frame and air gaps in the glass. These air inlets are intentional and are not alterable under warranty.

GLASS DOORS FOR ZC FIREPLACES

STOLL GLASS DOORS FOR MANUFACTURED FIREPLACES are known for their quality, style and durability. With six Collections to choose from, there are limitless ways to replace your stock "factory-built" doors with a top quality fireplace enclosure.

Choose doors constructed of steel or extruded aluminum frames; from powdercoat or anodized finishes and from multiple mesh and glass options.

ZC Kingston

Pewter

The ZC Kingston is a sleek, minimalist door with large viewing area and smooth handles. Unique frame design allows for doors to open 180° even with hidden hinge system. Constructed with 14 gauge formed steel, the narrow 1¼" frame can be powder coated or overlaid.

All doors for Zero Clearance Fireplaces are designed with proper air flow to ensure they meet the UL127 code as well as the ventilation requirements of the fireplace.

Fire shown inside closed doors is for display purposes only. Do NOT burn with fireplace doors closed as the fireplace may overheat or you may damage your doors.

STEEL DOORS FOR ZC

ZC Original

Filigree Option in Polished Brass Complete Overlay

The ZC Original Collection can be configured as overlap or inside fit. Overlap uses slotted-edges around the outer frame or filigree on top and bottom to allow airflow into the fireplace, while Inside Fit uses 1/4" gap between main frame and firebox. Constructed with 14 gauge formed steel.

ZC Trimline

4-Sided Frame in Weathered Brown w/ Brushed Copper Doors

Our most popular ZC door - Trimline is made of 1/8" Bar Iron to achieve a thin profile. This uniquely designed frame overlaps the opening slightly, while allowing air to enter the firebox through a narrow gap around the main frame. Aesthetically pleasing and very versatile with multiple finishes.

ZC Bar Iron

Brushed Chrome w/ Textured Black Doors

Premium Bar is a sturdy, sophisticated look, with it's 3/16" bar iron frame. Each door is custom made, so let your imagination be your guide. Airflow is provided with special spacers on the back of the mainframe, allowing the door to overlap the opening for the look of a masonry door.

ZC Forged & Aged Iron

Arch Conversion in Charcoal w/ Strap Handles & Hinges

The unique detailed look of the Forged & Aged Collections will accent your room unlike any other product. The hammered and distressed metal frames make so no two enclosures are the same. Add strap hinges for an "Old World" look. Spacers on the back of the mainframe allow essential airflow.

ALUMINUM DOORS FOR ZC

ZC Huntington

Anodized Brushed Brass

THE HUNTINGTON thin and sleek rectangular frame is well suited for smooth facias such as marble, tile or granite. The minimalist frame emphasizes the fire, creating a warm atmosphere in the room. Essential firebox ventilation is provided by special hidden slots located on the inside of the frame.

ZC Lancaster

Anodized Antique Pewter

The beveled frame of **THE LANCASTER** offers classic styling with an updated flair, making a bold statement that will highlight your fireplace perfectly. Fits well in fireplaces where maximum overlap is needed. As with all Aluminum doors, a Stainless Steel hardware kit can be added for outdoor use.

ZC Coronado

Anodized Brite Nickel Main Frame & Textured Black Doors

The deep, double radius frame of **THE CORONADO** creates a unique 3D appearance that brings life to each and every fireplace setting it graces. This remarkable extrusion design will draw attention to your fireplace. For more details about the ZC Aluminum doors, please see Legacy Collection brochure.

ZC Stockton

Anodized Brite Copper

THE STOCKTON smooth radius frame establishes an understated elegance; simple design details create a quiet and subtle accent that blends with any decór. Choose from one of our 5 Anodized, 15 Powdercoat, or 4 Premium finishes to create the perfect compliment to your fireplace.

ZC REFACE

Every **ZC REFACE** is unique; specially made for each fireplace by custom-sizing the frame and the louvers to fit perfectly. Choose from a wide range of styles, from modern & contemporary to rustic & old world. Our neodymium “rare earth” magnetic mounting system allows the ReFace to attach firmly and quickly.

Best of all, ReFace doors eliminate drafts common with manufactured fireplaces and reduce up to 90% of the heat going up the chimney. Enhance beauty, increase efficiency and heighten safety quickly and easily.

DV ReFACE

Direct Vent gas fireplaces are a popular and efficient source of heat, but many do not offer stylish door and screen options. **STOLL'S DV REFACE COLLECTION** is the perfect solution to transform your “black box” into a showpiece. For a more personal touch... order custom laser-cut scenes or designs of your own imagination. Our “snap-on” magnetic installation makes it simple to keep loved ones and pets away from the hot glass surface. DV ReFace screens meet all ventilation requirements of the fireplace manufacturer.
